

The Trendiest Shoes for the Spring Season

Spring is here again! If your poor feet have been suffering all winter long, check out some of the latest spring show trends. This fun and comfortable footwear will immediately wipe away the winter blues.

Spring is all about vibrant color and energy, and the latest crop of trendy spring shows fits right in. No matter what your style is, these shoes are sure to dazzle with off-the-wall abstract designs and playful colors.

Technicolor Dream

Forget the demure muted tones of the winter season and bring on the color. The latest spring shoes are sure to stimulate the senses. Wild colors are definitely in. There are many neon and flashy metallic shoes to brighten up any wardrobe.

Many designs go crazy over color and create a mixture of tones and hues using complicated stitching. The result is psychedelic-style floral and geometric patterns that celebrate all things spring. The unexpected additions silver and gold accents to these patterns or on traditional warm weather sandals will brighten up any outfit.

Attention to Detail

Nothing adds drama to a well-designed shoe like a well-placed detail. This spring all the hottest shoes have just a little something extra. Perforations on boots and pumps have made a comeback for good reason. The playful windows allow ventilation for the feet and make stiff styles less formal. For sandals with straps, nothing draws attention like clunky jewels. Large stones reflect the sun and make these comfortable shoes sparkle.

Another emerging trend is bead detailing. Intricate beadwork draws the eye over the graceful lines of the footwear and provides a graphic area of interest for the eye. These masterpieces offer a down-to-earth and handmade feel to any outfit. If you have bohemian style, beaded sandals are the perfect addition to your wardrobe.

Unexpected Materials

Take a walk on the wild side with the latest shoe material trends. Alligator and snakeskin shoes are nothing new, but this spring they are getting revamped. Patchwork designs consisting of many different textures reveal a touch of danger with the unmistakable texture of alligator. These materials not only make durable shoes, but the texture and colors make the details pop.

Patent leather may seem a bit stuffy, but it is getting a makeover for the spring season. Fun boots and flats made out of the stiff stuff can be worn to work or out on the town. Paring the leather with unexpected shapes and colors brings the formal material down to earth.

The Trendiest Styles

The Gladiator Sandal. This casual flat is a great option for those who value comfort, but still want attractive shoes. The gladiator sandal is surprising sturdy and perfect for those seeking a more natural look. They are often made in leather with fabulous beading or strap detailing.

Platforms and Wedges. There is nothing better than a platform or wedge done right. These solid shoes add height without making the wearer feel unwieldy. Those who need the lift should know that they are back. Wedges and platforms this spring will go back to their roots with bright colors and interesting shapes.

The Pump with a Twist. Most women have a trusty pair of pumps that will work with anything, but these versatile shoes don't get the recognition they deserve. This spring, the pump is celebrated with some fashion forward patterns and color. Wouldn't a flowered or patent leather lime green pump make a great addition to your collection?

The Peep-toe Sandal. Dying to show off a pedicure but not the rest of your foot? Try a peep-toe sandal. These versatile shoes are the perfect transition from winter to summer and they come in virtually every imaginable height and color. There is a peep-toe shoe for everyone.

More Ideas

Those who still love ballerina flats need not worry, because they are in this spring. The comfortable footwear is now available in funky colors or more demure metallic. These slip-on-and-go shoes are just what you need for running errands in style.

Few have seen boots like this. Some of the hippest new spring shoes are flirty peep-toe and perforated knee-highs. There are also multi-colored and python-skinned varieties. You will not want to hide these under a pair of jeans.

Just remember that spring styles are all about comfort and fun. All of the trendiest shoes allow you to show off your flirty side without sacrificing the ability to move freely in the warmer weather. Find the style that is right for you and look fabulous this season.
