

Bonsai Supplies...Make or Break?

At first it can be off-putting with the amount of information found on growing Bonsai trees. This can lead the new-comer to thinking it's all too hard and giving up. But this would be a mistake because one simple secret is to have available some good quality Bonsai supplies and GO FOR IT!

There are many skills to be learned in the art of Bonsai. As you become more skilled over time you may even get to call yourself a master of the art. But one of the first steps to help you get started is to have good quality Bonsai supplies. The last thing you want is for poor quality supplies to hamper your results.

With the right supplies readily available, this is one area of your project that is already taken care of. Now you can concentrate on the job at hand and not be limited by a lack of the proper Bonsai supplies, be that soil mix, fertiliser, tools, wire or whatever is necessary to do the job!

So what are the proper supplies? Simply tools and supplies that are of good quality and appropriate for the job that needs doing. The last thing you want is for your tree not to flourish because because the soil was not free draining enough or you cause a wound on the tree due to blunt and rusty shears.

It may not seem much of a big deal to you but your plants will certainly love you for it.

Of course I am not suggesting that you will fail to achieve a beautiful result unless you have everything you need readily available and of top quality. What is more important is the desire to learn the techniques and the patience to put them into practice until you have mastered the art.

You will have failures that will dismay you, but you will have successes that will outweigh those times. Those successes along with the sheer pleasure of nurturing a Bonsai tree from just a tree to a fully fledged Bonsai is what will keep you going.

Your Bonsai supplies will then be just another addition to your library of knowledge on the subject. When someone then asks you about Bonsai, you will have had the experience of success and failure to pass on your knowledge with the authority of one who knows.
